Interests

- Basketball
- Editing
- Football
- Starting a Business
- Video Filming
- Photography
- Learning Coding
- Working on Robot Kits

As a student, my objective is to obtain a Bachelor's degree in Computer Science, where I can leverage my academic achievements, leadership skills, and passion for coding to contribute to the university community and advance my career goals. By pursuing a degree, I aim to immerse myself in a challenging, diverse, and intellectually stimulating academic environment that will expand my knowledge, hone my critical thinking, and develop my professional competencies. I am eager to engage in coursework, research, internships, and extracurricular activities that will enable me to apply theory to practice collaborate with peers and mentors, and gain hands-on experience in Robotics. Ultimately, I aspire to use my education to pursue a career in Computer Science, where I can make a positive impact on society and achieve personal fulfilment.
